

# NIS2-ready in 90 days

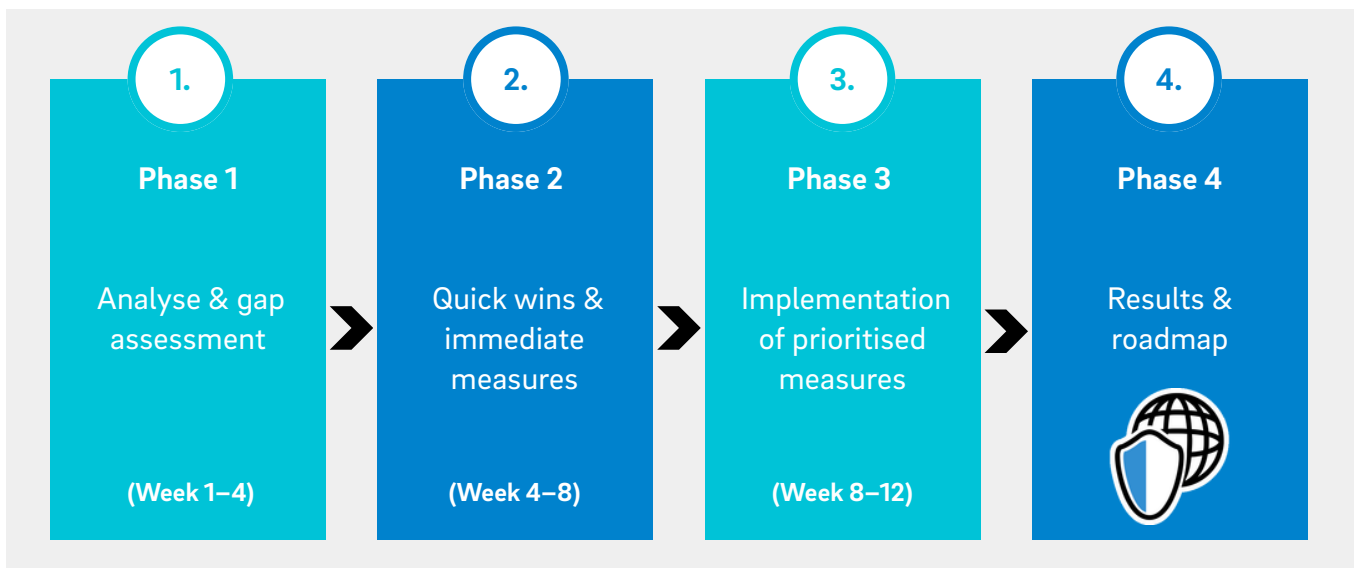

Precise analysis, rapid impact, measurable security

## NIS-2: New obligations. Greater risks. A clear need for action.

The NIS2 Directive is tightening cyber security requirements – making a structured approach essential. Many organisations are now, for the first time, subject to regulatory obligations and must demonstrably implement both technical and organisational security measures.

logineer delivers a compact, highly effective 90-day programme focused on transparency, tangible security improvements, and a clear roadmap towards full NIS2 compliance.

Create clarity. Implement security. In four phases.

## Your 90-day programme for NIS2 compliance

With the logineer **NIS2-ready-in-90-days programme**, we support organisations in a structured way from the initial assessment through to sustainable compliance. At the outset, your current security and governance status is analysed, and specific NIS2 gaps are identified and prioritised. Based on this, fastacting technical and organisational measures are implemented to create transparency, improve responsiveness, and establish clear responsibilities. In the subsequent implementation phase, prioritised measures are put into place – from monitoring and vulnerability management through to incident and recovery processes. Finally, you receive a **robust set of documented results along with an individual roadmap** for the coming months, enabling you to meet NIS2 requirements sustainably and in an audit-ready manner.

## Not convinced yet? Your benefits:

### Certified quality

logineer's security services are extensively tested and certified

- ✓ ISO 27001
- ✓ ISO 27014
- ✓ ISO 9001
- ✓ Additional certifications & audits

### Sovereign infrastructure

Data centres with the highest levels of security and IT sovereignty

- ✓ ISO 27001
- ✓ TSI Level 3
- ✓ EN 50600
- ✓ ISAE 3402
- ✓ ISO 50001
- ✓ BSI-C5:2020 attestation

### Quick start for your compliance

Now is the right time to act

- ✓ Standardised process
- ✓ Clearly defined phases with measurable outputs
- ✓ Transparent effort, responsibilities & dependencies
- ✓ Scalable setup for ongoing operations

### You understand every step

We work transparently

- ✓ Clear roadmap with milestones
- ✓ Regular status reports
- ✓ Full documentation of all measures
- ✓ Clearly defined responsibilities and timelines
- ✓ You remain in control at every stage

## Everything from a single source! A reliable partnership:

- ✓ Strategic analysis & consulting
- ✓ Practical and pragmatic implementation
- ✓ Security operations via our own Cyber Defence Centres
- ✓ Full implementation of all NIS2 requirements
- ✓ Regular security reviews
- ✓ Continuous development of your cyber security strategy
- ✓ Optional: managed services for continuous monitoring
